D/A:

[REDACTED] attended meeting of the R PROCEDURE SUBCOMMITTEE at which the following case (among others) was considered: (1) Application by General Motors Corporation for the export to Denmark, for RE-EXPORT TO POLAND under terms of the Danish-Polish trade agreement, of AUTOMOBILE REPLACEMENT PARTS valued at \$210,250. The Ford Motor Company similarly has received an order for an additional \$170,000 of parts to Denmark for re-export to Poland. Neither GMC nor Ford have evidenced an interest in filling these orders, and GMC has indicated that such deliveries depend on US Government approval. This case INVOLVES A POLISH THREAT TO WITHHOLD DELIVERY OF \$20 MILLION WORTH OF COAL TO DENMARK IN EVENT OF NON-DELIVERY by Denmark of these automobile parts, 2/3's of which are for repair of GMC and Chevrolet trucks, five tons and under. Such trucks are presumably of the 2-1/2 ton type, delivered under Lend-Lease and suitable for military transportation. This case will be given further consideration at the 8 June meeting of the R Procedure Subcommittee. (4 hrs) (5 Jun)

D/B (Continued)

the President's Materials Policy Commission. Provision will be made for Mr. Ames to have access to first drafts of material prepared by the Bureau of Mines in view of the fact that published NIS sections will not be available in time for this report. Mr. Ames understands that this will be unevaluated intelligence, that it must be afforded the security classification of the basic reports, and that he will submit his report for review by CIA prior to its submittal to the President's Materials Policy Commission to ensure that it conforms with security requirements. (1/2 hr) (31 May)
